

Homework 5

VPN & SNMP

hcchuang

Architecture

Spec

VPN

- OpenVPN only
- Allocate private IPs for clients

SNMP

- For version v1 or v2c, the community name called “public” is not allowed

MRTG

- Query CPU/Memory/Network usage from SNMP
- Generate graphs

Web Server

- Show MRTG graphs to the clients with private IP
- You can response the clients with public IP at will, however it should be done by web server configure and different from private one.

Hand-in

□ Demo

- 06/20 (Wed.) 18:30~21:30
